# WE ARE CAVIUS

Welcome to the world of CAVIUS. Since 2004 we have inspired the World of alarms, protected homes and saved lives.

In 2004, CEO and founder, Glenn Højmosé, decided to leave his design career and follow a lifelong dream. The first CAVIUS product, the travel alarm, was brought to market in 2007, featuring a motion sensor and smoke detector.

The alarm went on to claim international recognition and to win the prestigious Red Dot Award.

In 2010, we introduced the world's smallest photoelectric smoke alarm, using the experience from the travel alarm. The new smoke alarm was unique because of the EN-approved micro-design and special features.

CAVIUS introduced a complete range of Safety and Security products, all communicating wirelessly, back in 2017. This new range brings you unrivaled system

communication between wireless battery operated alarms and mains powered alarms.

CAVIUS manages to communicate across features, without compromising on design.

In 2018 expanded the range with Homeautomation through a CAVIUS App and the World's smallest HUB. This will bring you peace of mind when you leave your home.

In addition, CAVIUS also introduced the Door/Window sensor and Movement sensor. This expands the CAVIUS range from Safety products, to also include Security products.

Other IOT (Internet Of Things) will follow.

The unique Danish design combined with a professional UK-based R&D team, brings you the most advanced alarms. Welcome to our world - We are CAVIUS.

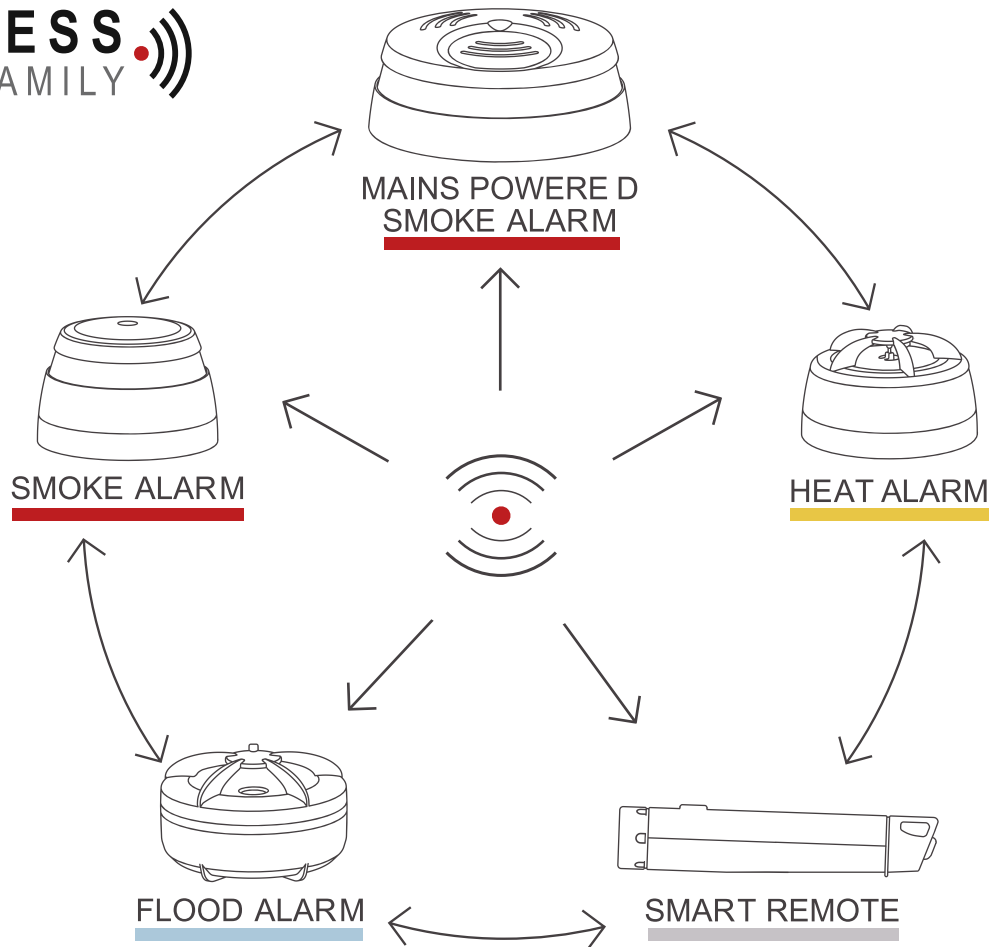

## PRODUCT HISTORY

# CAVIUS

ALERT | AWAKE | ALIVE

## WIRELESS ALARM FAMILY

Cavius invented the most simple technique to link The Wireless Alarm Family. Simply put all devices in LEARN MODE and press the TOP button on 1 device. All alarms will then start flashing, to verify the communication. Then put all back in NORMAL MODE. You are now ready to place the alarms. This is CAVIUS simplicity.

All devices, no matter what feature, has the exact same switch in order to avoid any misunderstandings.

SMOKE  
ALARM

MAINS  
POWERED

DANISH  
DESIGN

100%  
TESTED

In pure Cavius cone shape design, the Cavius mains powered smoke alarm device 110-230V AC is featuring a wireless interlink and CR2 Lithium battery back-up. You can connect the alarm to other Cavius Wireless Alarm Family range using the easy to connect learn switch, placed on the back of the alarm.

Divided in two major parts, the smoke alarm unit and the power supply unit, it can be installed in a base on the ceiling or directly in a conduit box in the ceiling.

Cavius mains powered smoke alarm can work as a lamp outlet or lamp hook, to avoid an extra spot on the ceiling. The alarm is designed with a built in slot for vacuuming the smoke chamber from distance. Furthermore, the test button is incorporated in the top which makes it easy to test during vacuuming.

## WIRELESS SMOKE ALARM

Diameter: 65 mm

WIRELESS  
ALARM FAMILY  
SMOKE  
ALARM

DANISH  
DESIGN

5 YEAR  
BATTERY

100%  
TESTED

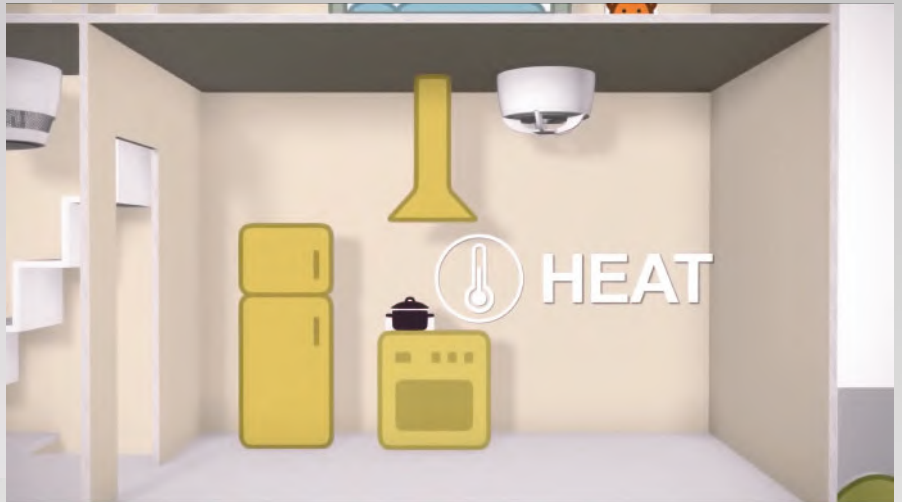

Cavius expertise is now extended to the world of wireless technology, with a new smoke alarm specifically designed to perfectly fit the modern family's need for home safety. Your whole home is now under control. Its 65mm cone shape body includes an optical 5 years battery life smoke alarm device with wireless interlink, to be connected within a house group and with other alarms from the Cavius Wireless Alarm Family.

Its wide and easy to access test button will allow you to check its penetrating sound of 85dB(A) at 3 meters, or to activate a 10 minutes pause function.

## WIRELESS HEAT ALARM

Diameter: 65 mm

WIRELESS  
ALARM FAMILY  
**HEAT**  
ALARM

DANISH  
DESIGN

5 YEAR  
BATTERY

100%  
TESTED

Cavius heat alarm is a thermo sensitive detector with wireless technology, detecting rapidly increased heat or absolute heat level. Its compact 65mm cone shape design includes a 5 year battery, 5 year warranty, a powerful 85dB(A) siren at 3 meters and a wide and easy to access test button which also allow to activate a 10 minutes pause function. The heat alarm Wireless Family is communicating with other detectors across features.

## WIRELESS FLOOD ALARM

Diameter: 65 mm

WIRELESS  
ALARM FAMILY  
**FLOOD**  
ALARM

DANISH  
DESIGN

5 YEAR  
BATTERY

100%  
TESTED

Cavius still comes breaking design codes with its new wireless flood alarm, designed with a 5 year battery life, 5 year warranty and a 85dB(A) siren to warn the family against flood in basements. Part of the Cavius Wireless Alarm Family, It is able to link with other safety devices and thereby be alert to any kind of unpleasant household threads.

The Cavius flood/water alarm is ideal for use near the zink, washing machine, dishwasher etc.

## WIRELESS SMART REMOTE

Cavius has created the smart remote for the Wireless Alarm Family range. The communication between the alarm devices and the remote is unique. If an alarm occurs, the Cavius Smart Remote will activate and help you escape.

- Remote control: Test your alarms from a distance.
- Remote pause function: In case of false alarms from cooking, smoke from your fireplace etc.
- Emergency flashlight, that helps you find your way out.
- Grab and go magnet: Includes a metal wall hanger with double sided tape, for easy mounting.

## CAVIUS BUILD IN BASE

### The World's smallest, just got smaller!

The new top button on the 40 mm, 65mm and 78mm product lines, allows you to build in the Cavius “stand alone” models. And will make your Cavius alarm even more unnoticed. Designed with standard Cavius snap features, it will substitute original mounting base and allow you to hide much of your alarm into the ceiling.

The first “build in” base, to pass the Fireroom Test.

Cavius build-in base is available in 40mm (10 years alarms), 65mm and 78mm.

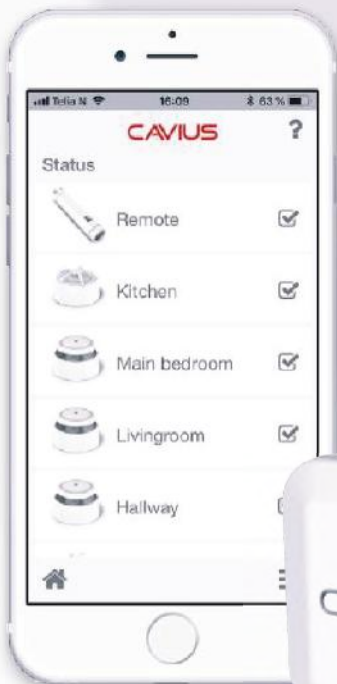

# MONITOR YOUR **CAVIUS** DEVICES WITH YOUR SMARTPHONE OR TABLET

## SAFE & SECURE HOME SYSTEM

The CAVIUS hub will allow you to communicate with the CAVIUS wireless devices through the CAVIUS App on your smartphone or tablet, providing an early warning system and reliable informations on your devices status.

The CAVIUS hub and App works as a safety and security system. If you have a fire or a water leak you will get a notification. If someone breaks in your house you will get a warning. Invite your friends and neighbours to be notified

- 1 CONNECT THE HUB TO THE INTERNET
- 2 DOWNLOAD THE CAVIUS ALARM APP FOR FREE
- 3 FOLLOW THE EASY INSTRUCTION - READY TO GO!

CAVIUS APP

CAVIUS HUB

- GET AN EARLY WARNING ON YOUR SMARTPHONE
- COMPATIBLE WITH CAVIUS WIRELESS FAMILY
- CREATE A SAFE & SECURE HOME
- NO SERVICE FEE & FREE APP
- ONLINE SECURITY
- NEIGHBOURHOOD WATCH
- EASY MOUNTING & INSTALLATION
- WORKS WITH THE GOOGLE ASSISTANT
